 - ◆ And more...
- ◆ Dealers: Wholesale Flies Available

Fly-tying comes naturally to third generation fly-tyer & pigeon fancier, Bill Porter. Barely into his teens, Bill has bred fowl all his life and added carving and fly-tying to his accomplishments about six years ago.

Descending from 13 generations of hunters and trappers, Bill uses hair, feathers and fur from deer, squirrel, beaver, muskrat and more in his fly-tying.

Bill, son of George & Kathy Porter, has many other accomplishments. He is a published poet, National Geographic Bee winner, honor student and a Knowledge Masters winner. And Bill has helped George with buck tails for baits for years. Articles have appeared in local papers about Bill.
